

Year of Tiger: realities and expectations

We already stand on the threshold of Tiger New Year and, as usual, ask for itself that it is possible to expect from it. Of course, it is desirable to believe that it will be the happiest for passing, will bring a health and activities to all of us. However, that no reserves are done on the future, then it away to expect something kind in a coming year. And, if not vaccination itself now, then on what it is possible to expect ahead - only on the further tests of fate by new strain on COVID. Therefore is it so desirable to ask all our readers, and you have vaccinated already? And it is a not rhetorical question, because if majority from you watched our publications and participated to the discussion of economic crisis scales from domination of pandemic not only in Ukraine but also in the whole world, then must comprehend these losses... And it is not only large financial losses, but also human lives that it is impossible already to turn!!! As often for the last year it was to read obituaries about our colleagues of young, healthy, complete forces and hopes on the future, and all - there are not even hopes on anything. And almost each, who considered around, that this problem will touch them never, and not vaccinated, already had had COVID, and so, that little by little went back to normal life. Really it is a signal for us, that without a vaccination we will not overcome this illness and will not become stronger and more proof to all life changes. And by the way, the coming year of Tiger promises many revolutionary surprises and antecedents of light and dark line to us. Therefore must be ready to it!

Therefore we in future plan to conduct on the pages of magazine different discussions in relation to development of socio-economic crises, descendant COVID 19, provide for in future to bring over to work from criticizing of the articles of experts from the different countries of the world and work as independent opponents in similar European editions. And also to cooperate with our colleagues from different high school of Ukraine, because its experience and propaganda of front-rank acquisitions of science practice in the different spheres of national economy are very appropriate for our magazine. But we will try to abandon the iniquity that is wired for principles on the top page of motto of our magazine, and it touches exactly permanent self-perfection, improvisation and submission of audience of our readers, opponents, supporters and friends our creative going to all questions, for whatever of us undertook.

It is therefore desirable to wish to all our colleagues, readers, opponents, friends and supporter in Tiger New Year to be strong, healthy, brave, complete to optimism and enthusiasm in relation to overcoming of all obstacles that will arise up on the way of life, as a symbol of animal that will head a coming year! Successes, new acquisitions and purposefulness in the new undertaking!
