

Submission to Goverla..!

In the issue of October 2015, it is the main release of the magazine, about the worker of our university who participated to the educational lectures and debates from the exchange experience at the universities of Ternopil, Ivano-Frankivsk and Lutsk. It is the already not the first our visit in this year to West Ukraine. But why our experience was divided only now, because of the differences of social attitudes between its trips. Now, looking back too the past half year, our university receives a full attention about our scientific work. At the present conference, we expressed our gratitude to those works from these universities, which influenced us, during this year. The works presented to this conference, helped us, to find application of their ideas, in our territory in the East Ukraine. It was interesting, to look to our departments, with which we communicated after math, how our experience from the conference, helped them. They asked us, to provide our materials, for an extensive examination, with the purpose of social intercourse in the educational, scientific, and editorial activity. Such attitude inspired us, to search for new forms and methods of work, for more knowledge, socializing the authors, readers and the potential opponents, in the scientific environment.

We are sincerely grateful to our leaders and managers of financial and economical departments of the Ternopil National Technical University after name of Ivan Pulii, Prykarpattya National University after name of Vasyl Stefanyk, East European National University after the name of Lesia Ukrainka for their help and support, which they gave us. Without doubt, in such sincere situation we were able to feel that East and the West Ukraine is together. After such unity and support, we can master the scientific excellence, what Goverla with members of the editorial board, shared with us, to print in our magazine.

In the end, I would like to wish to all our readers, authors, and officials and non-official opponents, to feel the reviewers of our magazine, about the scholarly master work received by our patriots of Ukraine, in the scientific work, at Goverla.

Editor of the magazine
“The time description of economic reform”
